

Kemet

Ultrasonic Cleaners and Consumables

For over 65 years, Kemet International Limited has been leading the way in surface finishing including lapping and polishing. Surface Finishing also embodies cleaning as the final or intermediate stage in the process. Following intensive R&D investigations, we have now put together a complete programme of top quality ultrasonic cleaners and detergents, from 3 litres to 3000 litres.

Laboratory ultrasonic cleaners – from 3 to 20 litres for cleaning of small precision parts such as jewellery, watchmaking, optics and healthcare.

Semi Industrial Ultrasonic Cleaners – from 25 to 160 Litres for cleaning of mechanical seals, mould tools and other precision production parts.

Industrial ultrasonic cleaners – custom built from 200 to 650 litres for larger precision production parts.

Mould Cleaning Systems – from 40 to 3000 litres for heavy duty cleaning of injection moulds, extrusions and die castings.

Versa systems – from 40 to 160 litres, these ultrasonic cleaners have a reduced footprint. Important where space is an issue.

Transport systems – Automatic transport systems for moving the basket from one tank to another.

Rinse Tanks – Available from 25 to 160 litres for removing detergent residues

Dewatering tanks - Available from 25 to 160 litres. Allows removal of water from parts, prior to storage.

Hot Air Dryers – Available from 40 to 80 Litres. For drying parts.

Detergents – 7 aqueous detergents covering acidic, neutral and alkali chemistry, allowing cleaning of most contamination
