

Kemet Bespoke Aqueous Systems and Services

Additional to the range of standard systems Kemet can design and produce bespoke systems to suit your application.

These can range from a simple, robust single or multi unit Mould cleaner to fully Automated Basket Transport Systems.

We have a team of Technical Representatives throughout the UK who can also advise on Kemet's Precision Surface Finishing Products.

We are able to provide:-

- Cleaning Specialists.
- Extensive range of concentrated detergents.
- Kemet's own chemists, to give advice.
- Test and demonstration either on site all at Kemet's facilities.
- Factory Acceptance testing, commissioning and training.
- Servicing contracts.
